# Protocol definition

Demers, Gealy, Greene, Hauser, Irish, Larson, Manning, Shenker, Sturgis, Swinehart, Terry, Woods'87

- 1. The ground is a simple connected graph.
- 2. At time 0, one vertex knows a rumour.
- 3. At each time-step 1, 2, ..., every informed vertex tells the rumour to a random neighbour.

イロト イポト イヨト イヨト 三日

# Protocol definition

Demers, Gealy, Greene, Hauser, Irish, Larson, Manning, Shenker, Sturgis, Swinehart, Terry, Woods'87

- 1. The ground is a simple connected graph.
- 2. At time 0, one vertex knows a rumour.
- 3. At each time-step 1, 2, ..., every informed vertex tells the rumour to a random neighbour.

Remark 1. Informed vertex may call a neighbour in consecutive steps. Remark 2. If a vertex receives the rumour at time t, it starts passing it from time t + 1.

# Protocol definition

Demers, Gealy, Greene, Hauser, Irish, Larson, Manning, Shenker, Sturgis, Swinehart, Terry, Woods'87

- 1. The ground is a simple connected graph.
- 2. At time 0, one vertex knows a rumour.
- 3. At each time-step 1, 2, ..., every informed vertex tells the rumour to a random neighbour.

Remark 1. Informed vertex may call a neighbour in consecutive steps. Remark 2. If a vertex receives the rumour at time t, it starts passing it from time t + 1.

inform-time(v): the first time v learns the rumour.

Spread Time: the first time everyone knows the rumour.
