

Test Script

Hello Test Conductor!

Please use this script as a basis to cover as many aspects of the game in order to permit us to evaluate our design as best as possible.

Task 1: Please select the Wire Loop Game application

Instruction: Please ask the user to select the Wire Loop Game icon to run the application. Please record how much time it takes.

Observations:

Task 2: Once the application is opened, please look at the instructing simulation to learn how the game works.

Instruction: Please ask the user to look at the instructing simulation and ask the user if it is understandable and helpful.

Observations:

Task 3: Please select a level that is available

Observations:

Task 4: Start playing the game

Observations:

(if level failed)

Task 5: Try playing this level again

Observations:

(if failed again)

Task 5.1: Please try out another level

Observations:

Task 5.2: Please try playing that selected level

Observations:

(if passed level with perfect score)

Task 6: Please play this game again, this time try to reduce your points

Observations:

(if passed level)

Task 7: Please play this game again to improve your score

Observations:

Task 8: Go to the game's home screen

Observations:

Take 9: Close the application

Observations:
